1. What is my site's primary purpose?

Keeping up with Kaylin – somewhere for me to showcase whatever I want, my own personal newsletter

- Something new I learnt (The coding I'm learning to do)
- Something I found funny
- Puzzle / Word / Picture of the week
- Something new I learnt
- Upcoming events
- Advice column

2. Who is my audience? (is it kids, adults, academics)?

Kids, Adults, Probably not academics – Jenny is ok. Mostly my mates

3. How will I build my site to support their user experience?

Links everywhere, Big bold text, borders for everything

4. Wireframe - can I draw my site layout on paper? Draw it!

Similar to these.

5. What will my site layout look like on a mobile phone? On a tablet? On a desktop?

Almost exactly the same, I think it'll be predominantly phone-based idk the difference between Pinterest on a laptop and on a phone, similar but small with less per 'page'

6. What other directories do I need (e.g. images)? Where do I put that directory?

Idk, I want each blog post to be like that^ so idk what the homepage will look like... Definitely need images though.

7. Do I also want the style to be applied to all of my blog entries?

Yeah probably, just for continuity.
